PROFILE

Frontend Developer with 2+ years of experience building scalable, production-grade web applications, including a multi-tenant SaaS ERP system handling inventory, orders, invoices, and payments.

Strong in end-to-end ownership, performance optimization (improved by 25%), and building complex business workflows for real-world applications in fast-paced environments.

SKILLS

Frontend

React.js, TypeScript, Redux, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Responsive Design, Next.js, React Query, Pixel-Perfect UI Development.

Tools & Libraries

Git, GitHub, Webpack, NPM, Babel, React Router, Postman, Netlify, D3.js, Figma

APIs and Backend

Payload CMS, Node.js, Express.js, RESTful APIs, JWT Authentication, AWS S3 (file uploads & retrieval), MongoDB Transactions, Multi-tenant Architecture

Other

Agile, CI/CD, SEO (React Helmet), Cross-Browser Compatibility, Performance Testing (Lighthouse, Web Vitals), Jest, React Testing Library, Unit & Integration Testing

PROFESSIONAL EXPERIENCE

12/2023 – Present
Bagalkot, India

Mid Level Software Developer

Springevening Private Limited

- Developed scalable, reusable component architecture using React.js, Next.js, Redux, focusing on maintainable code and best practices.
- Delivered pixel-perfect UI screens from Figma designs, ensuring strict design accuracy and cross-browser compatibility.
- Built mobile-first responsive interfaces with strong attention to accessibility (WCAG), ADA compliance, performance, and UX.
- Implemented REST API integration, handling asynchronous data flows, error handling, caching, and secure communication.
- Improved frontend performance by 25% using lazy loading, code splitting, caching strategies, and Lighthouse-based auditing.
- Optimized build and bundle size using Webpack enhancements, tree-shaking, and code-splitting, improving load speeds and performance.
- Led feature development and guided junior developers/interns to ensure code quality and delivery timelines.
- Utilized Jest and React Testing Library for unit and integration testing, improving code reliability and reducing production issues.
- Deployed applications using Netlify & GitLab CI/CD pipelines to ensure smooth, automated builds and efficient delivery cycles.
- Performed advanced debugging using Chrome DevTools and performance profiling tools to diagnose UI bottlenecks and rendering issues.
- Contributed to building business-critical workflows including inventory management, order processing, and payment flows through seamless frontend-backend integration.
- Built and maintained complex, high-usage workflows across inventory, order management, and billing systems.

- Worked on complex data-driven applications, ensuring consistency between UI state and backend systems using efficient API handling and caching strategies.

Personal Project

SaaS ERP System — React.js, Node.js, MongoDB

- Built a production-grade, multi-tenant SaaS ERP system (end-to-end ownership)
- Designed and developed a multi-tenant ERP system to manage business operations including inventory, products, orders, invoices, payments, customers, and vendors.
- **Implemented core workflows:**
 - Order creation with automatic stock deduction
 - Invoice generation with Razorpay payment integration
 - Product and inventory synchronization
- Built a scalable frontend using React.js and React Query for efficient data fetching, caching, and real-time UI updates.
- Architected backend with tenant-based database isolation, JWT authentication, and structured REST APIs.
- Implemented transactional workflows using MongoDB sessions to ensure data consistency across orders, inventory, and invoices.
- Developed reusable UI components to standardize workflows across multiple modules.
- Implemented role-based access control (RBAC) and middleware-driven API security for multi-user system access.
- Built dashboard analytics, CSV export, and PDF invoice generation features.

EDUCATION

08/2019 – 09/2023	Basaveshwar Engineering College
Bagalkot, India	Electronics and Instrumentation Engineering

CERTIFICATES

- Frontend Developer (React)
